A BUILDING PRODUCT OF GREAT LAKES CARBON CORPORATION
AND ITS EXCLUSIVE PERMALITE LICENSEES

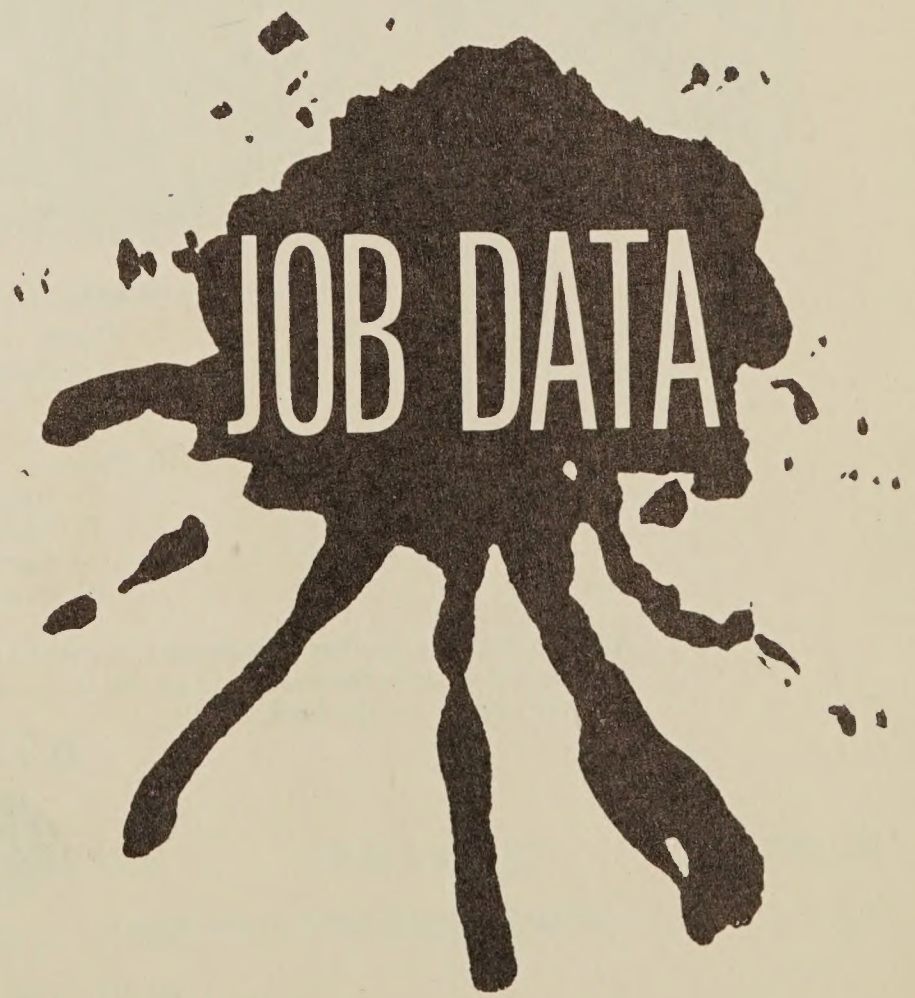

FOR THE WORLD

FOR THE WORLD

FOR THE WORLD

FOR THE WORLD

FOR THE WORLD

FOREWORD

The use of PERMALITE lightweight aggregates is increasing at an amazingly fast pace. Introduced on the west coast four years ago, PERMALITE is now sold nationally.

To meet the increasing demand, Great Lakes Carbon Corporation has doubled their Torrance, California Plant capacity, has built within the last year a large new processing plant in Linden, N. J., and is rapidly establishing exclusive PERMALITE licensees with modern processing plants, in all of the major cities of the United States. These combined operations make PERMALITE by far the largest selling perlite aggregate in the United States.

At the outset, the producers of PERMALITE were faced with the problems of the development of specific technical data and the securing of building code approvals. Today this technical data is available and building code approvals have been obtained in most of the larger cities throughout the country. Various applications of PERMALITE have successfully passed rigid fire tests at the Underwriters' Laboratories and the U. S. Bureau of Standards. The principal trading areas in which PERMALITE has been used in the greatest quantities are:

- 1) Los Angeles and adjacent territory.
- 2) Texas, particularly the Dallas-Houston area.
- 3) Oklahoma.
- 4) Metropolitan Chicago.
- 5) New York City and adjacent territory.
- 6) Philadelphia and adjacent territory.
- 7) Washington, D. C. and adjacent territory.

This widespread distribution is proof of the approval and acceptance of PERMALITE by Architects, Engineers, Federal, State, County and City Officials, General Contractors, Plastering Contractors, Dealers and the Building Trade Unions.

It is the purpose of this booklet to provide specific data on typical PERMALITE installations throughout the United States. These data include the use of PERMALITE in the following applications:

I. RESIDENTIAL

- A) Plaster
 - 1) Scratch and Brown Base Coats
 - 2) Fireproofing
- B) Concrete
 - 1) Insulating Floor Slabs
- C) Stucco
- D) Thermal Fill Insulation

II. COMMERCIAL AND INSTITUTIONAL

- A) Plaster
 - 1) Scratch and Brown Base Coats
 - 2) Fireproofing
 - 3) Acoustical
- B) Concrete
 - 1) Roof Decks
 - 2) Floor Fill
 - 3) Curtain Walls
 - 4) Stairwells & Elevator Shafts

Anyone desiring further information about PERMALITE lightweight aggregates and/or specific job data should write to the nearest Great Lakes Carbon Corporation Office or to the exclusive PERMALITE licensee shown on the back cover.
